

Nevada PowerPoint Presentation

You will be preparing a PowerPoint presentation on the State of Nevada. Your presentation will include a title slide and five additional slides. You will be finding the information found in your presentation.

1. Spend a couple of minutes looking for the following images and facts about the State of Nevada. Try going to <http://www.leg.state.nv.us/General/FACTS.cfm> or use Google to help you
 - The state flower (find an image of it)
 - The state animal (find an image)
 - The state flag (find an image)
 - The state capitol building image
 - Three interesting facts about Nevada (no image needed)

Hint: when you find an image, right-button click on it and then select save as. Save the image files on your disk.

2. Put the following on the title slide: Title field: **State of Nevada**
Subtitle field: **Your Name**
3. Create an additional slide for each of the images you found. Label each accordingly (i.e. Nevada State Flower: Sagebrush).
4. Put the three interesting facts on another slide. *Place the facts in the form of a bulleted list.*
5. Apply a “Fly In” animation from the left on each bullet on the facts page.
6. Make sure the font in the title field of the title slide is larger than the others.
7. Use the slide master to make each of the backgrounds one of the colors found on the State of Nevada flag.
8. Change the font colors to look good with the background colors.
9. Apply a “Checkerboard Across” transition at medium speed on all slides.
10. Save your presentation as *Nevada Presentation*.
11. Print all slides on one page.
