

Own Choice PowerPoint Project

You know the basics of PowerPoint, now it's time to put your knowledge to work. You're going to create a PowerPoint project of your choice (the subject matter is up to you). Although the project is using subject matter of your choice, you must follow the criteria below:

1. Your PowerPoint presentation must be a minimum of 10 slides. Include the following slides:
 - Title Slide: Include the title of your presentation and a subtitle with your name.
 - At least nine additional slides: Include your subject matter or animation slides (if doing an animation presentation).
2. Add an entrance custom animation of your choice to the title slide (the title and subtitle should be animated to appear from one direction or transition in). You may add additional animations to other slides if desired.
3. Add an animated transition between the title slide and the second slide. You may add additional transitions if desired.
4. Print the presentation in Handout View with six slides per page.
