

Movie Project Presentation

Each group member will need to address a different discussion question below. Each person will be graded on the completeness of the answer.

1. **Idea & Script**: How was the idea for the movie developed? Was a script written and followed during the production process?
2. **Modeling**: What process or technique was used to model the objects in the movie (i.e. tutorials used; subpatched shapes; combined primitive shapes)?
3. **Textures & Special Effects**: How and when were textures applied to the objects? Were special effects used in the movie (i.e. volumetrics, hypervoxels, etc.)?
4. **Animation & Rendering**: Describe the animation of the movie. Were movements repeat? How long did the rendering process take?
5. **Impressions**: Discuss the strongest and weakest points of the movie. Did the movie end up being as planned?
